ATTN: Threat Intelligence Provisions

RE: Authorization for Platform Access – Emily Garcia

To Whom It May Concern,

I am writing to formally request user access to the BIO-ISAC Threat Intelligence Platform for **Emily Garcia**, a key member of our Event & Facility Operations team.

As indicated by her **Season All-Access (24-25)** status, Ms. Garcia is responsible for critical operational logistics and facility management across our athletic venues. Given the increasing convergence of physical and digital security threats, specifically regarding facility infrastructure and environmental safety, it is imperative that our operations team has real-time visibility into relevant threat landscapes.

We have identified a need for Ms. Garcia to access the BIO-ISAC platform to monitor for specific vulnerabilities that may impact large-scale venue operations, including supply chain biosecurity and facility-related threat vectors.

Name: Emily Garcia

Title: Event & Facility Operations

Department: UA Athletics / Operations

Access Level: Field Access / Operational Staff

Please process this request at your earliest convenience. If additional verification or specific sponsorship forms are required, please do not hesitate to contact my office directly.

Roll Tide,

Director of Event & Facility Operations

University of Alabama Athletics
